INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY, NOVEMBER 3, 1999 - 0530 MST NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Increased initial attack activity occurred in the Eastern and Southern Areas, with minimal activity reported elsewhere. Good progress was made on the large fires in the Northern Rockies and Eastern Areas. Very high to extreme fire indices were reported in California, Arizona, Colorado, Nebraska, South Dakota, Wyoming, and Missouri.

NORTHERN ROCKIES AREA LARGE FIRES:

ROUGH CREEK/SQUAW GAP, Dakota Prairie National Forest. A Type II Incident Management Team (Hoff) is assigned. These fires are southwest of Watford City, ND. The Squaw Gap fire is estimated at 59,000 acres while the Rough Creek fire is estimated at 9,000 acres. Crews made good progress with fireline construction and mop-up.

MILL IRON, Eastern Land Office, Montana State. This fire is east of Ekalaka, MT. No new information was received.

JOHNSTONE, Eastern Land Office, Montana State. This fire is near Ekalaka, MT. No new information was received.

NES = Northeastern Land Office.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. An Area Command Team (Edrington) is assigned. A Unified Command with two Type I Incident Management Teams (Hutchinson and Stutler) and the Hoopa Tribe is assigned. The complex is 28 miles northwest of Weaverville, CA and consists of the Megram and Onion fires. Mop-up is focused on isolated hot spots near the fireline. Fire resources are gathering intelligence about fire rehabilitation needs.

MCKINLEY	MN MNS	3200 90	11/1	20	0	4	0	0	NR	NR

OUTLOOK:

A high pressure system will remain over most of the western U.S. continuing dry conditions. A weakening Pacific storm will spread clouds across western Oregon with rain showers confined to the northwestern portion of the state. Seasonal temperatures for the rest of the Intermountain west will be 50's in the mountains and 60's in the valleys. Light winds and seasonal relative humidities can be expected.

Most of California will experience warmer temperatures and slightly drier relative humidities. Afternoon temperatures will be in the 70's and 80's, and minimum relative humidities will range from 10 to 30 percent. Winds will be light and variable.

A dry ridge of high pressure is building over the northern Rockies and will bring temperatures to eastern Montana in the 50's and 60's. Relative humidities will fall below 20 percent at many locations and overnight recovery will be poor. Winds will remain light.

A high pressure ridge extending from the southern plains northward through the southern Dakotas will drift slowly eastward across Minnesota. This should continue dry conditions in the area with maximum temperatures in the mid 40's and 50's. Winds will be generally from the northwest and can be expected to be under 15 MPH.

High pressure will rebuild over the southeastern U.S. with fair and cool conditions. A cold front passing across the northeast will bring cooler temperatures and snowfall in some areas.
